Enhanced Oil Recovery

INTERNATIONAL
CONSULTANCY & SERVICES

PETRO-TEC EOR

INTERNATIONAL EOR CONSULTANTS

Foreword:

EOR is becoming the focus of the oil industry since the last two decades. The importance of EOR techniques is growing as the “Easy Oil” is becoming rare, and companies have to look into how to scrape the remaining oil in mature fields. Implementation of such EOR techniques needs in-depth knowledge in the stages of EOR screening, Experimental work, Pilot Planning, Simulation Studies, Facility design, and EOR implementation, and Project monitoring. The above phases also require integration between the different disciplines involved as the work phases overlap and the need for experiences across the disciplines is important. To ascertain the needed integration, PETRO-TEC presents an Integrated EOR team of Consultants to the Oil Industry to handle EOR Projects from A to Z.

Scope of services:

- To Undertake EOR Screening Studies.
- To Design EOR Laboratories, EOR Experiments, and train on Experimental work.
- To Run Simulation Studies for Different EOR Processes.
- To Advice on selection of EOR techniques for Reservoir Candidates.
- To Design Pilot Projects, and Advice on Pilot Evaluation and Analysis.
- To Undertake the whole EOR application Process for any field.
- To design Surface and Subsurface Facilities for any EOR project.
- To give General Consultancy and Training in EOR
- EOR study review, Audit, and Peer Review advisory

Composition of the Group:

The Group is composed of International Experts with cross discipline worldwide experience. The Consultants represent **experiences from across the globe** including Venezuela, USA, Oman, India, China, and many other parts of the world. The team is composed of a **core of Consultants** and a group of **Associates**. For any project, a team of consultants will be assigned based on the type of experience and work discipline.

We strive to be a one stop solution for all EOR needs from screening to full field implementation. Please contact us with your needs for an immediate attention.

CONSULTING SERVICES

EO Screening	EO Full Studies	LAB Experiment Planning	SWCTT Design & Analysis	FACILITIES Design
PILOT Projects	EO Simulation	LAB Experiment Execution	EO AUDIT And Peer Reviews	TRAINING

EOR PROCESSES WITHIN OUR SCOPE

ASP	POLYMER	SAGD	GOGD	THERMAL
CO2 Injection	GOGD	NITROGEN	WAG	MISCIBLE Disp.
ORCO	DME	LAB Experiment	LSF	STEAM
