

# AG1 INTERNATIONAL COMPARATIVE PETROLEUM LAW, EXPLORATION AGREEMENTS, AND THE ENVIRONMENT

Dr. Walid El-Malik

Fees: 1950 €

DUBAI: 6 – 10 April 2019

## COURSE OVERVIEW

Petroleum exploration and production has developed in a truly international industry. The distinctive relationship between the owners of the resource, and the companies exploiting the reserves, has become ever more complex and demanding. A vast array of legislation, policy documents, contractual forms and dispute resolutions has developed around the fundamental point of sharing the resultant wealth between the state and the producer.

Protection of the environment in the oil industry is becoming a major concern. Consequently, the knowledge of the petroleum industry and its constituent law, policy and environmental issues, together with an ability to understand and analyze actions of governments and companies, is becoming increasingly important.

This course covers most aspects of the international oil and gas laws & agreements with special emphasis on environmental issues.

## WHO SHOULD ATTEND

This course is designed for managers and senior staff of natural resource and oil companies involved in constructing or negotiating petroleum agreements. It is particularly important for the staff of petroleum ministries, environmental agencies, law firms, and consulting companies.

## COURSE CONTENT
